WHAT'S GOING ON???
Today The Villages Amateur Radio Club is participating in a national event commonly referred to as "Field Day". This event encourages amateur operators, or "Hams", to set up their equipment at remote locations using auxiliary power sources to demonstrate their ability to respond to emergency situations.
The first Field Day was held in 1933, and it has since become the largest emergency preparedness exercise in the country with as many as 30,000 Hams participating every year.
Being able to operate off the grid during natural disasters or severe weather is a key element in providing a viable communications network at these times. Field Day helps the Ham community prepare for these conditions.
The Villages Amateur Radio Club has set up several antennas and radios for this year's Field Day. They will be operating continuously for 24 hours, making contacts with other Hams around the country.
The primary purpose of this event is to demonstrate how amateur radio can respond to emergency situations, but there is also a contesting element associated with it. All contacts made by the club are compiled and compared with other clubs around the country. The Villages Amateur Radio Club is very proud that it consistently ranks very high in the ratings.
The Villages Amateur Radio Club meets every third Tuesday at 7:00 PM at the Lake Miona Recreation Center. Everyone is welcome to join us, and you don't need a Ham license to join. Check out our web site at WWW.K4VRC.ORG for more details.
