## Sumter County ARES

**Amateur Radio Emergency Service** 

Presentation to
The Villages Amateur Radio Club

Presented by Mark Newby, KX4LEO

www.sumterares.org

## What is ARES?

Amateur Radio Emergency Service®

## What is ARES?

ARES is a program of the ARRL®, offering to the public and to its partners trained, licensed amateur radio operators who are skilled in applying a wide range of effective communications services in times of disaster and for non-emergency public events.

## **RF Nets**

4<sup>th</sup> Thursday of each month at 7:30 PM, KS4EOC Repeater 146.925 MHz (-) Offset, PL 123.0 Hz

- You do not have to be a member of ARES to participate. All are encouraged to check in.
- Check equipment to ensure it is in a state of readiness.
- Test equipment's effective range via repeaters and simplex.
- Receive information from the ARES leadership and its Officers.
- Discuss the logistics of upcoming events.
- Participate in training and simulated exercises.
- Discuss matters related to emergency communications and preparedness.
- Enter formal traffic into the National Traffic System (NTS)

## Membership Meetings

2<sup>nd</sup> Wednesday each month at 7:30 PM ET (In-Person or On-Line)

- You do not have to be a member of ARES to participate. All are encouraged to join the meeting.
- Link to Zoom meeting found at <u>www.sumterares.org/calendar</u>
- Receive information from the ARES leadership and its Officers.
- Discuss the logistics of upcoming events.
- Conduct training that cannot be performed over the air.
- Discuss matters related to emergency communications and preparedness.

# Membership Requirements

- Hold a Technician or higher-class amateur radio license.
- Have an operable amateur radio station, (Hand-Held, Mobile, or Base Transceiver)
- Be a full-time or part-time resident of Sumter County or adjacent county.
- Have a sincere desire to provide a volunteer public service to the communities in Sumter
   County. Depending on your own physical abilities, you may volunteer from your home, office or in a field assignment.
- Have the physical ability to effectively communicate by voice over a 2-way radio. For those with hearing
  or speech limitations, the ability to communicate by alternative methods, i.e. CW, Packet, Digital, WinLink,
  PSK31, etc.
- Have the ability to work well with others, and to receive and effectively carry out instructions.
- No background checks are required unless you also enroll in the local RACES program.

#### Amateur Radio Emergency Service® -- ARES® Fact Sheet

Amateur Radio Emergency Service\* (ARES\*): ARES is a program of ARRI. The National Association for Ametiur Radio\*, ordering to the public and to its pariners trained federally licensed operators who are skilled in applying a wide range of effective emergency/disaster communications techniques and who are committed to supporting our partners' missions in service to the public.

ARES Vision Statement: ARES will be the premier amateur radio emergency communications service to the United States and its territories.

ARES Mission Statement: ARES strives to be an effective partner in emergency/disaster response, providing the citizenry and public service/safety partners with communications expertise, situational awareness, and capabilities of professional communicators.

#### APPE Value

- RELEVANT: ARES is there When All Else Falls\*... and before.

LEADERSHIP: ARES leverages the strength of its ARRI. member-volunteers and the leaders within its
organizational structure to create and nurture professional-level relationships with community, government
and other partners in memberous management.

RESOURCEFUL: ARES strives to be an invaluable tool that communities and first responders can call upon in times of popul for reliable and robust communities.

INNOVATIVE: ARES adopts state-of-the-art capabilities for deployment, setup, and operation of world-class, recilient communications from exercitions centers to field because.

 SKILLED: ARES volunteers will have access to leading training courses in radio communications and related technologies to support wide-ranging emergency scenarios.

EQUIPPED: ARES provides robust, multi-spectrum analog and digital communications as well as networking
 ess of location for inversor, mobile, and fixed capabilities.

two broad categories: government agencies (federal, state,

Emergency Communications Division of the Cybersecurity Homeland Security, ARRL and ARES support and encourage

working with government agencies will function in partnership orandoms of Understanding MOUs) at the federal state, or e served agency while not in conflict with ARISS guidelines and ons Centers (EOCs) in felds deployments with a variety of additional training or screening, including

rtnerships with other NGOs and maintains agreements with partizations in many capacities, including shelters, aid stations, attons may require additional training or other requirements. If seel is appropriate for them.

And More ...

### **Nationwide Exercise**

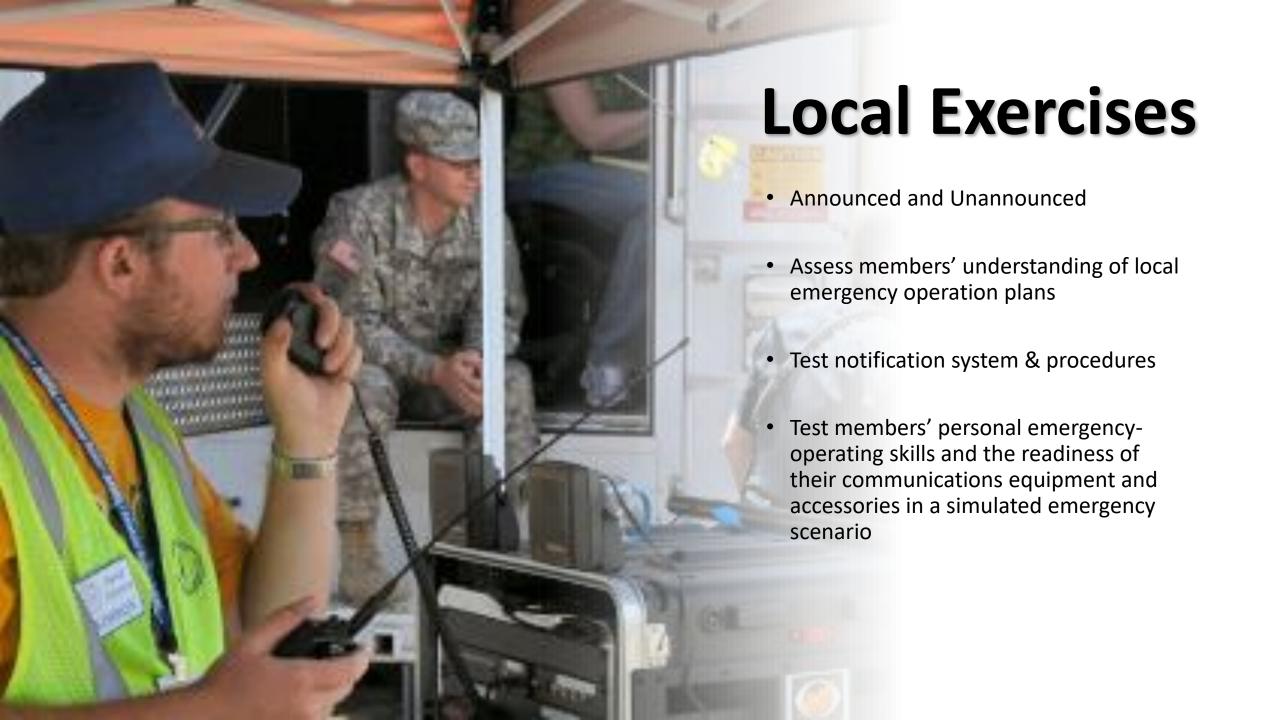

ARRL's Simulated Emergency Test (SET), October 7 - 8, 2023.

- Nationwide exercise to test personal emergency-operating skills and the readiness of ARES teams across the nation in a simulated emergency-like deployment.
- State and local Emergency Operations Centers in participating states
- Emergency Radio Nets are activated
  - Local emergency radio Nets
  - Emergency HF Nets
- In conjunction with other emergency management and response organizations, i.e. Emergency Management Offices, CERT, RACES, NTS, Red Cross, Salvation Army, Local Law Enforcement, Fire/Rescue, etc.
- ARES personnel may simulate deploying to field assignments, i.e. shelters, points of distribution, hospitals, etc.

- Late Winter or early Spring due to Hurricane Season in the Fall
- Scenario based
- ARES teams in all Sections in the Florida participate
- State and local Emergency Operations Centers
- Emergency Radio Nets are activated
  - Local emergency radio Nets
  - Emergency HF Nets
  - Statewide Amateur Radio Network (SARNET)
- In conjunction with other emergency management and response organizations, i.e. Emergency Management Offices, CERT, RACES, Red Cross, Salvation Army, Local Law Enforcement, Fire/Rescue, etc.
- ARES personnel may simulate deploying to field assignments, i.e. shelters, points of distribution, hospitals, etc.

# Sumter County ARES Manual

#### No Alert **Not Active**

#### Level 3 **Monitoring**

Level 2 Partial Activation

Level 1 Full Activation

**Level 3 – Monitoring** will serve to notify Sumter County ARES members that their services may be needed on short notice any time in the next 48-72 hours. When the Sumter County ARES EC or AEC declares a Level-3 activation, its members are to monitor conditions and remain available to receive further information through any of the following methods:

- Monitor the Logistics repeater listed in Appendix-4A of this Manual.
- If radio reception is not available, monitor the Alerts and Activations page on the <a href="www.sumterares.org/alert">www.sumterares.org/alert</a> website and frequently check your email for official messages from the EC or AEC.
- If neither the radio nor internet is available, remain close to your mobile or landline telephone.
- Although a Directed Net is permissible, a Net operating during Level-3 is normally running ad hoc, (not a directed Net). Sumter ARES members will monitor the Logistics repeater, until otherwise directed by the EC or AEC, to receive any assignments, condition updates, and announcement of status level changes from the EC or AEC.

Level-2 Partial Activation will be declared for Sumter County ARES by its EC or AEC under any of the following conditions: (a) When specific ARES duty posts / field assignments in Sumter County are to be staffed and made operational; or (b) When requests are received from the NFL Section or any other County under mutual aid; or (c) When requests are made by the Sumter County Emergency Manager or any one of our other served agencies. Most emergencies, even severe ones, can normally be managed at Level-2.

The EC or AEC will assume the responsibilities of the Sumter ARES Incident Commander (AIC) or delegate the responsibility to another qualified member. The AIC is authorized to direct all Sumter County ARES operations during a Level-2 or Level-1 activation. This authority does not extend outside the Sumter County ARES organization.

For an incident that warrants a Level-2 activation under the ARES protocol, it can reasonably be assumed that the Sumter County Emergency Manager will activate the Sumter County Emergency Operations Center. In which case, amateur radio operators who are registered volunteers with the Sumter County Emergency Management, referred herein as "Sumter County RACES", will staff the amateur radio operations room in the EOC. The RACES Radio Officer will determine if a directed Operations / Admin Net will be activated on its respective repeater listed in Appendix-4A of this Manual, and if so, assign a Net Control Station. Depending on the scope of the emergency, the RACES Radio Officer may also assign a Net Control Station to operate a directed Logistics Net on its respective repeater.

Sumter ARES members will monitor the Logistics repeater unless directed by the AIC to switch frequencies. If the AIC assigns an ARES member to a post/field assignment which will require communications to or from the EOC, the AIC will instruct that member to switch to the Operations / Admin Net and check in with that NCS.

Level-1 Full Activation is the highest possible level of alert in an emergency communications operation. It is useful for maintaining tight control on HF circuits where heavy traffic and numerous stations may increase channel load on nets. When distress traffic is being handled on any emergency net or frequency, the activated level is automatically Level-1 and remains so until all distress traffic has been cleared. Level-1 activation can be declared by the EC or AEC at the local level; however, such activation should be coordinated with the NFL Section Manager or Section Emergency Coordinator. Level-1 activation is declared by issuance of a Priority bulletin to be transmitted on all active net frequencies. It applies to all nets and geographic areas designated in the formal order.

Sumter County Emergency Management – Operations / Admin Net

Repeater Call Sign	Location	RX Freq	TX Freq	CTCSS Tone	EchoLink	AllStar
KS4EOC	Sumterville, FL	146.925 (You Receive)	146.325 (You Transmit)	123.0	KD8WAA-R (648680)	53446

During a Level-2 or Level-1 activation, the Sumter County RACES Radio Officer may activate a directed **Operations / Admin. Net** on this repeater and assigned a Net Control Station. Only those stations who have been instructed to operate on this frequency should use it. *Please note that EchoLink and AllStar access may be terminated during the activation.* 

ARES members who are instructed by the AIC on the **Logistics** repeater to deploy to posts or field assignments will typically be instructed to switch to this **Operations / Admin. Net** and check in with that NCS. In the event this repeater fails, monitor the K4HOG and KI4DYE repeaters for instructions on alternative repeater and Net assignments.

Hog County Amateur Radio Club – Logistics Net

Repeater Call Sign	Location	RX Freq	TX Freq	CTCSS Tone	EchoLink	AllStar
K4HOG	Sumterville, FL	147.030 (You Receive)	147.630 (You Transmit)	123.0	K4VEB-R (294541)	49829

During Alert Level-3, Sumter County ARES members are to monitor this frequency. Although a Directed Net is permissible, a Net operating during Level-3 is normally running ad hoc, (not a directed Net). Sumter ARES members will monitor this frequency to receive any instructions, assignments, condition updates, and announcement of status level changes from the EC or AEC on this repeater.

During Alert Level-2 or Level-1, in addition to an **Operations / Admin Net** that may have been activated on the KS4EOC repeater, the RACES Radio Officer may also assign a Net Control Station to operate a directed **Logistics Net** on this repeater if the scope of the situation warrants. ARES members should not switch to the **Operations / Admin Net** or any other frequency unless instructed to do so by the AIC or NCS. In the event this repeater fails, monitor the KS4EOC and KI4DYE repeaters for instructions on alternative repeater and Net assignments.

Repeater Call Sign	Location	RX Freq	TX Freq	CTCSS Tone	EchoLink	AllStar
